PROFESSIONAL SUMMARY

I'm a programmer focused in Typescript and React - my main skills - as well as having certifications in Node, Python, Java and Cloud Computing (AWS Certified Cloud Practitioner). My previous trajectory as a History Teacher also provided me with solid interpersonal and collaborative skills, honed through years of experience in school classrooms. Currently I'm a Junior Developer at a Software House, working with technologies like Node + React and No-Code/Low-Code with Bubble/Flutterflow, developing both hard and soft skills.

My purpose is to contribute positively to people's well-being, and I see technology as a way to fulfill this goal. Each and every learned skill or completed project is developed with a perspective focused on the final user, seeking out the democratization and improved accessibility of technology.

TECHNICAL SUMMARY

Languages: TypeScript, JavaScript, Node.JS, HTML, CSS, Python, Java.

Frameworks and Tools: React.JS, NextJS, NestJS, Tailwind, Bootstrap, Insomnia, Material UI, Git.

Platforms: Amazon Web Services (EC2, EC, S3, VPC, Route 53, CloudFront), Bubble, Flutterflow.

Databases: MySQL, PostgreSQL, MongoDB.

EDUCATION

Technologist in Software Analysis and Development | Completion: 06/2026

Institution: Catholic University of Santos.

Undergraduate degree in the technology area, covering many topics such as Programming Logic, Web Development, Back-end and Front-End, Mobile Development, Systems Architectures, Software Quality, Networks and Databases. The degree also covers topics such as Business Administration, Non-Violent Communication and Emotional Intelligence.

Full-Stack Developer Java | Completion: 08/2023 Institution: Generation Brazil.

Final Project: Together with 3 other people, we developed a social network called Conexão Ybyra, with the objective of connecting people to revitalize public squares and parks in their communities. We utilized all technologies learned along the course, such as: MySQL for the database; Java and Spring in the Back-End; React, TypeScript and Tailwind in the Front-End, as well as other technologies such as EmailJS and Axios API.

History Degree | Completion: 12/2021
Institution: Catholic University of Santos.

I have 2 years of experience as a History Teacher, in which I have learned a set of skills transferable to the technology area. This includes skills such as efficient communication, collaboration in multidisciplinary teams, planning skills, conflict solving and leadership of discussion groups.

PROFESSIONAL EXPERIENCE

DevMagic

Junior Software Developer– 12/2023 – Current Job

Current experience in a Software House. Working with the Web Development Team using Typescript, SQL, React and Nest, and working with the No-code/Low-code team using Bubble and FlutterFlow. Always supervised by senior developers, I'm improving my hard skills and soft skills, such as personal organizing and time management, as well as effective communication via Jira and Slack.

State of São Paulo Education System

Human Sciences Teacher – 03/2022 (start) – 02/2023

I have 1 year of experience in state high schools, creating classes planning (yearly and monthly), and extracurricular activities. I have focused on promoting the students' critical-philosophical thinking, autonomy and teamwork, and stimulating their historical perspective and sense of self and community at the same time. Interdisciplinary collaborations resulted in arts expositions, sciences fairs and sports events, strengthening student's bonds and interpersonal relationships.

LANGUAGES

English - Fluency Level: Advanced
Spanish - Fluency Level: Basic

EXTRACURRICULAR COURSES & CERTIFICATIONS

AWS Certified Cloud Practitioner | Issue Date: 09/2023 | Institution: Amazon Web Services Training and Certification

AWS Fundamentals | Completion Date: 06/2023 | Institution: Escola da Nuvem | 101h

Study program focused on the Cloud Computing Services provided by AWS. Studying primarily with EC2, EC, S3, VPC, Route 53, CloudFront, CloudTrail, CloudFormation, CloudWatch and RDS.

Full Stack Development | Completion Date: 02/2023 | Institution: Tera

Study program focused on the following technologies: Front-End (HTML, CSS, JS, React), Back-End (RESTful APIs with Node and Python), Databases (MongoDB and PostgreSQL), and Cloud Computing (AWS).
